<TSS> TROMMEL SCREEN

tb technobalt

TROMMEL SCREEN is a separating unit which is used in the solid-waste processing industries. Material is fed into a trommel and passes over a series of screens containing specific hole sizes. Various sizes of perforations and screen sizes are available to optimize the screening process.

TECHNICAL INFORMATION:

Trommel diameter (mm):	2000	2000	2500	2500	2500	2500
Screen length (mm):	5000	6250	6250	7500	8750	10000
Sections (pc):	4	5	5	6	7	8
Wheels (pc):	4	4	4	4	4	4
Power (kW):	2x7,5	2x7,5	2x11	2x15	2x15	2x22
Capacity (m ³ /h):	60	70	75	85	100	115
Inclination angle (°):	3	3	3	3	3	3

* Other sizes and additional options according to the inquiry.
